Twilight Sparkle's Secret Shipfic Folder

The Card Game

Objective

While playing this game you will construct a labyrinthine flowchart of relationships between Twilight and everypony else, competing to bend those relationships into the shape of Twilight's goals for the fanfic.

For each goal, you'll earn a number of points determined by the difficulty of that Goal card.

Winning Score

3 or fewer players	11 points
4+ players	9 points

1

Shipping Ponies, Powers, etc.

To ship Ponies, slide a Ship card halfway beneath a Pony card already on the grid and place a Pony card on top of the exposed half. Leave enough space between the Ponies to show there's a Ship card beneath. A Pony can have 4 Ships attached to it: above, below, left, and right.

A Pony's power activates immediately after it is added to the grid from the player's hand. The exception is any card that says "while this card is still in your hand". A Pony's power can affect itself unless otherwise stated on the card.

Two Pony cards that are adjacent but not connected by a Ship card are not considered shipped. Sliding a Ship card between them is a valid play.

If any card is no longer connected to the grid it must be discarded.

Ship cards without two Pony cards attached must be discarded.

3

If a Deck Runs Out:

Simply shuffle the respective discard pile into the deck. If there is no discard pile to shuffle, however ...

Tearing Up Twilight's Notes

If you need to draw a card but there is neither deck nor discard pile, Twilight Sparkle has run out of ideas. She becomes frustrated with her notes, and in a fit of anger, destroys some of her work.

1. The current player selects one Ship card on the grid and discards it.
2. Discard any Ship or Pony cards no longer connected to the shipping grid.
3. Shuffle the newly created discard pile(s) to create a new deck, if that deck was empty.
4. The current player then draws from the new deck. If it runs out before they draw all their needed cards, rinse and repeat!
